

Julia Mitka

UX/UI DESIGNER

Cracow, Poland | 530 740 141 | julia.mitka98@gmail.com | Portfolio: www.juliamitka.pl

SUMMARY

UX/UI Designer with almost 3 years of experience, with strong background in system analysis. Combining analytical thinking with a design thinking approach, focused on simplifying flows, organizing information, and creating clear, user-friendly interfaces. Experienced in supporting UX/UI awareness within an organization and promoting a more thoughtful approach to product design.

EXPERIENCE

UX/UI DESIGNER | July 2025 - July 2026 | Kaczmariski Group

- Ownership of the design process for two B2B customer panels for a business information exchange platform - from identifying UX issues to delivering final UI solutions.
- Redesign and simplification of complex user flows across existing products, focusing on clarity, usability, and visual consistency.
- Redesign of a client-facing mobile app, with a strong focus on improving the onboarding experience.
- Heuristic UX audits of existing products and identification of areas for further redesign.
- Collaboration with, PMs, POs, developers, and customer-facing teams to balance user needs, business goals, and technical constraints.
- Presentation of design concepts and solutions to key stakeholders, including senior management.
- Creation and development of a component library using tokens and documentation to support design consistency.
- Use of AI tools to support design exploration, iteration, and workflow improvements.

JUNIOR UX/UI DESIGNER | October 2023 - June 2025 | Kaczmariski Group

- Design of interfaces and user flows for B2B web products, from individual features to complete user journeys and one-page websites.
- Redesign and improvement of selected flows within existing applications, focusing on clarity and ease of use.
- Creation of wireframes, hi-fi mockups, and interactive prototypes in Figma.
- Collaboration with PMs, POs, developers, testers, and graphic designers throughout the design process.
- UX support for graphic designers working on websites and digital materials.
- Helped introduce a more structured design approach, increasing the organization’s UX maturity by conducting Figma training sessions and preparing presentations highlighting the rules and value of UX.
- Supported the growth of the UX/UI team by participating in the recruitment of another designer.

JUNIOR SYSTEM ANALYST | July 2022 - September 2023 | Kaczmariski Group

- Analysis and documentation of system architecture and communication between system components.
- Creation of UML diagrams in Enterprise Architect and documentation for development teams.
- Collaboration with development teams on requirements analysis and technical solutions.

SYSTEM ANALYST INTERN | July 2021 - June 2022 | Comarch

- Analysis of business and system requirements in collaboration with technical teams.
- Business and system process modelling using UML diagrams.
- Creation and maintenance of system documentation.
