SUMMARY

Product Designer with almost 3 years of UX/UI experience and a strong background in system analysis. Experienced in designing and improving **complex B2B digital products,** combining analytical thinking with a user-centred approach. Focused on **simplifying complex processes, improving usability, and translating business requirements** into clear digital experiences. Comfortable working across design, business, and technical teams and taking ownership from problem identification through implementation support.

EXPERIENCE

PRODUCT DESIGNER | Kaczmarski Group | July 2025 - July 2026

- **End-to-end UX/UI design for two core B2B customer platforms,** including the client portal of KRD, a company serving **1.18M clients across its services,** covering UX audits, problem identification, final UI design, developer handoff, and implementation support.
- **Redesign and simplification of complex user flows,** with a focus on usability, accessibility, and interaction consistency.
- **UX/UI improvements and redesign of existing mobile applications,** including user flows, onboarding, and new features.
- Collaboration with **PMs, POs, developers, QA, and customer-facing teams** to balance user needs, business goals, and technical constraints.
- **Presentation of design concepts and recommendations to key stakeholders and senior management.**
- Redesign of selected landing pages, **contributing to an increase in completed inquiry forms** through improved CTA placement and clearer communication.
- **Creation and maintenance of two product-specific Figma component libraries from scratch,** including reusable components, variables, design tokens, and UI guidelines.
- Use of **AI tools** to support design **exploration, prototyping, iteration, and workflow optimisation.**

JUNIOR UX/UI DESIGNER | Kaczmarski Group | October 2023 - June 2025

- Design of interfaces and user flows for **B2B web products,** from individual features to complete user journeys and one-page websites.
- **Redesign and improvement of existing flows** based on identified usability issues and product requirements.
- Creation of **wireframes, high-fidelity mockups, and interactive prototypes** in Figma.
- Collaboration with **PMs, POs, developers, testers, and graphic designers** throughout the design process.
- Providing UX support to graphic designers working on websites and digital materials.
- Contributing to the **development of UX practices within the organisation,** including Figma training and knowledge sharing across teams.
- **Participation in the recruitment** and evaluation of candidates for an additional UX/UI designer.

JUNIOR SYSTEM ANALYST | Kaczmarski Group | July 2022 - September 2023

- **Analysis of business and system requirements** and documentation of system architecture and communication between system components.
- Creation of **UML diagrams and technical documentation** for development teams using Enterprise Architect.
- Collaboration with development teams on **requirements analysis and technical solutions.**

SYSTEM ANALYST INTERN | Comarch | July 2021 - June 2022

- **Analysis of business and system requirements** in collaboration with technical teams.
- Business and system **process modelling** using UML diagrams.
- **Creation and maintenance of system documentation.**
